Healthcare

Flooring and Wall Protection for Healthcare Environments

In healthcare, every detail counts. At Gerflor, we are proud to be a global leader in innovative solutions designed to meet the strict demands of modern hospitals and healthcare facilities.

Our wide-ranging portfolio includes everything from hygienic surfaces for operating theatres to durable, comfortable flooring for patient rooms.

Design and Aesthetics

Design is not just about colors and patterns—it is just as much about functionality and safety for both patients and staff.

Easy Cleaning & Hygiene

Advanced surface treatments make our floors stain-resistant and simple to maintain—ensuring the highest standards of cleanliness.

Strength & Durability

Hospital floors face constant heavy traffic. That's why our solutions are engineered to withstand wear while maintaining their quality over time.

Hospital Flooring – a Foundation for Safety and Hygiene

In hospitals, flooring is far more than a design element – it plays a vital role in infection control. Healthcare environments are high-risk spaces where patients often have weakened immune systems, and each year lives are tragically lost to hospital-acquired infections.

That's why our flooring solutions are developed to create safe, clean, and sustainable spaces where patient safety always comes first. Our floors are not simply part of the décor; they are an important factor in reducing infection risks and improving quality of care.

With over **80 years'** combined experience in the healthcare sector, together we have built an unrivalled **reputation for quality and service.**

We offer a range of flooring products with designs accredited by the DSDC (Dementia Services Development Centre), which evaluates products based on how well they support orientation, safety, and well-being for people with dementia.

GERFLOR

Caring Solutions

We also understand the pressures healthcare professionals face every day. That's why we develop innovative solutions tailored to their needs – helping to ease their work while ensuring the best possible environment for patients.

WE CARE / WE ACT

Sustainability

At Gerflor, we take responsibility for delivering flooring and wall protection solutions that combine exceptional performance with environmental care.

Our products are built to last and designed to be recyclable, giving you the confidence that your choice is both high-quality and responsible.
